Julia Pasinski:
Picture "Resting white-cheeked geese" (2023)

€1,500.00

In the center of the painting, nestled in an autumn-toned landscape, rest white-cheeked geese taking a break on their journey. The birds, with their characteristic white face and gray, black plumage, contrast harmoniously with the bright reds of the spring and the soft purple of the heather. The dense field of heather and quoll gives the image a warm, almost melancholic mood that captures the spirit of autumn. You can almost feel the gentle rustle of the wind through the heather and hear the soft chatter of the geese. This image is not only a snapshot of the white-cheeked geese in their natural environment, but also a representation of the transition of the seasons and the rest before the journey continues. The painting is signed on the front and back. It is also dated on the reverse.
