

Michael Krähmer: Picture "Rocky coast I" (2024)

€2,900.00

The bright turquoise blue of the sea and the sunlit rocks bring freshness and clarity to the picture and the room in which it hangs. The picture is painted using the time-consuming resin oil glazing technique of the old masters. Transparent oil paint mixed with dissolved resin is glazed with a brush in many wafer-thin layers, creating shimmering, almost three-dimensional color spaces. The creation of such a painting takes up to a month.
