

Michael Krähmer: Picture "Bright spot XIV" (2011)

€4,800.00

The picture is painted using the time-consuming resin oil glazing technique of the old masters. Transparent oil paint mixed with dissolved resin is glazed with a brush in many wafer-thin layers, creating shimmering, almost three-dimensional color spaces. The creation of such a painting takes up to a month. A dramatic backlit scene shows a magical coastal landscape in the evening sun, which is obscured by passing clouds. The picture radiates a mystical mood.
