

Hasso Heybrock: Picture "Midday heat" (2023)

€1,200.00

In summer, when the sun barely casts a shadow at noon and the heat shimmers, nature and life seem to pause and rest a bit in preparation for the coming activities. Perhaps the air becomes too humid and wants to unload later in a thunderstorm, perhaps this does not happen today. This small dramaturgy shows "midday heat" in its friendly warm colors and thus causes the viewer a happy mood.
