

## Heinz Stoewer: Picture "Gentle meanders and currents" (2023)

€980.00

The work was inspired by the shapes and structures in a dry riverbed that emerge during floods or when the snow melts. When the water has disappeared, the meanders and traces of the currents become visible and a painting of nature is created. The artist has abstracted these impressions and changed their colors in such a way that something completely new and unique has been created. The work is dated and signed on the back.
