

Ute Meyer: Picture "Old tractor / Ærø" (2023)

€650.00

In June, I painted this picture in Vindeballe on the island of Ærø. From a distance, I spotted an impressive old tractor and got permission from the owner to paint it on site on his property. The original tractor seat was replaced by a black car seat with headrests. The bright turquoise blue of the tractor stands out impressively against the dark green of the surrounding vegetation, with scattered traces of rust flashing in vivid orange. In the background, freshly split wood can be seen in a pile. My brushstroke is expressive and the light is captured impressionistically. The painting is mounted on a wooden picture support and has a steel wire for hanging. The edges are white so that the painting can be hung directly.
