

## José Bifano: Picture "Structure 1.1" (2023)

€600.00

This painting is inspired by a structure composed of linear strokes that intersect and form a metallic network. The black and white image creates high contrast, producing a sense of strength and precision. Each line is carefully drawn and the result is a work with finishes that seem real. The image is perceived as if it were a photograph, but it also has an abstract air, as if the metallic structure were floating in space and time. This image is captivating and arouses the curiosity of the viewer with its precision and visual strength. This artwork was created using my own technique, which uses toilet paper as a support. In its creation, I used acrylic paints, glue, toilet paper, and water.
