

Carmen Lütkehaus: Picture "City Lights" (2024)

€2,000.00

This impressive painting shows an abstract city scene that captivates with vibrant colors and a dynamic composition. A bright yellow dominates, illuminating the silhouette of a bridge or building in the background. In front of it are stylized figures that appear to be arranged in groups and depict a scene of coming together or walking together. The figures are deliberately reduced, placing the focus on the colors and the atmosphere. The mixture of blue, gray and yellow tones gives the picture a harmonious, yet energetic effect. Ideal for anyone looking for a modern, urban work of art that radiates dynamism and calm at the same time and is an eye-catcher in any environment.
