

**su sea:**  
**Picture "Frida (Kahlo) I" (2022)**

**€3,800.00**

This work was awarded 3 art prizes: the 3rd place of the WORLD ART AWARDS 2023 (category PORTRAIT), the 3rd prize of the International Art Award of the Camelback Gallery, USA, Arizona, Scottsdale and the Honourable Mention Award of the Palm Art Awards 2022. For the picture series "Courage Strength Resilience - Lifelines of extraordinary women" I have chosen women who, from my personal point of view, have made extraordinary life achievements. Frida Kahlo was a very strong woman whose biography impressed me very much and inspired me to create this work. The decisive stimulus for the creation of this image was her proud, wandering into the distance look, which allows various interpretations for the viewer. For this mixed media work I used acrylic paint, plastic masses, graphite, tissue paper and charcoal. The work has structure through the plastic masses and tissue paper.
