

Christin Lutze: Picture "Summer light I" (2024)

€950.00

The viewer is led into a surreal summer landscape space. The space is theoretically accessible, but the viewing angles are distorted and unreal. The soft, light-flooded colors with delicate, warm tones make this small work very harmonious. The viewer is literally drawn into the room. Surfaces, shapes, colors and a balanced composition of these lead into a world in which the viewer can lose himself and dream.
