

Sabine Schramm: Picture "Tuscany (Plant no. 180402)" (2018)

The scent of Tuscany is in the air and splashes of red enchant this wonderful spot: fields of moonflowers as far as the eye can see. Cypresses seem to guard the fragile poppies. Let your soul dangle on a leisurely walk through the fields! A dreamlike light makes the heart beat faster. The artist wants to tell a story in her paintings and develop a harmonious, positive feeling for a place. Each work is created from her strong visual and emotional memories, and her associated thoughts are as integral to the painting as the shapes, colors and especially the light.
