

Hasso Heybrock: Picture "ved kysten 1" (2023)

€640.00

I work and live in the north of Germany and am often on the coasts of this very inspiring region. With small quick sketches I record my impressions on my walks and stays and later convert them into paintings in the studio. "Ved Kysten" gives such a sketch-like impression of a hike on the Wadden Sea of the North Sea. It is summer and the brilliant summer light emphasizes the vastness of the landscape. The coastline in the distance gives orientation. Everything is peaceful and bathed in warm colors. This mood creates inner peace and contentment.
