

Hasso Heybrock: Picture "light at the horizon" (2025)

€500.00

In the wide, flat landscape here on the coast, the atmosphere of twilight is particularly dramatic. Although the colors over the land are barely perceptible due to the darkness, the landscape structure is still recognizable and the stripe on the wide horizon impressively shows the power of light and life. The painting is painted on a wooden panel and some of the wood shavings stand out in the picture; a particularly exciting symbiosis of background and painting. The painting comes with a simple presentation frame that can be easily replaced.
