

## Michael Krähmer: Picture "Cala" (2007)

**€2,800.00**

The picture is painted using the time-consuming resin oil glazing technique of the old masters. Transparent oil paint mixed with dissolved resin is glazed with a brush in many wafer-thin layers, creating shimmering, almost three-dimensional color spaces. The creation of such a painting takes up to a month. A Mediterranean bay whose bright, warm colors evoke vacation feelings. The picture has a contrast grey anodized aluminium frame
