

Heinz Stoewer: Picture "Garden path" (2024)

€920.00

The painting was inspired by desert gardens in the southwest of the USA, where the reddish sandstone of the region is often used. The artist focused on the sandstone slabs, arranging them to form a garden path and playing with the reflections of light that might appear on the slabs. Light and shadow areas result in a composition of earthy red, turquoise and green tones. The work is signed and dated on the back.
