

Corinna Rosteck: Picture "Ravino" (2024)

€4,000.00

The motif was created in a botanical garden "Ravino" on the island of Ischia, which has long been an important place for my work and my connection to the Mediterranean and to water and light. By choosing a detail and exploring light and shadow, nature appears alienated. The over-really bright colors of the studies have the transparency and light-reflecting quality of the liquid element as their theme. Similar to the momentary structures of the waves, the variously iridescent shades of color express the simultaneously present and fleeting character of a moment.
